Fullstack Developer

Currently, I continue my academic journey in the Bachelor's degree in Physics at UFMG. In parallel, I work as a Mid-Level Front End Developer, collaborating with major Unilever brands, and working with technologies such as React, Vue, Gatsby, and GraphQL. In my previous experience as a Full Stack Developer, I was responsible for the autonomous development and maintenance of two vital applications, fully meeting client demands. I have solid experience with React and Node.js, supplemented by a deep understanding of deploy processes using AWS and Azure. Furthermore, I have extensive practical experience with AWS services, including EC2, RDS, and Amplify, skills that align with the requirements of modern and efficient cloud solutions.

Skills

Tools and Languages	JavaScript ES6, Typescript, Node.js, React, Gatsby, Vue, Express, Next, Azure, AWS, AWS RDS, AWS EC2, AWS Amplify, SSL Certificates, DNS, Sequelize, Jest and Cypress, TDD, CSS, Git and Github, Python, React Hooks and Context API, Redux, Docker, MySQL, Scrum, Kanban, Agile Methodologies, GraphQL, Typescript
Quantitative Research	Numerical Analysis, Matplotlib, Python
Communication	English (Advanced)

Experience

Mid-Level Front End Developer / The Brooklyn Brothers — 02-2023
The Brooklyn Brothers — *Remote*

- From 02-2023 to 07-2023, I worked on creating web components and pages in the site migration team, collaborating with brands like Seda, Axe, and Grom.
- Specialized in the use of AEM SAAS during the migration process, contributing to the modernization and optimization of the websites.
- Since 07-2023, I have transitioned to the global support team, becoming responsible for technical support and development of solutions for leading brands such as Axe, Rexona, Dove, Tresemme, Sedal, and Nexxus.
- I conduct weekly calls with brand managers in English, continually enhancing my communication skills and language proficiency.
- Gained hands-on experience with a wide range of technologies, including React, Vue, Sanity, and Netlify, while honing my customer service and project management skills.

Junior Full Stack Developer / Growth2data — 06/2021 — 02/2023
Growth2data — *Remote*

- Developed and maintained full stack web applications, being solely responsible for two key applications, ensuring their operability and ongoing innovation.
- Implemented user interfaces with React.js and built APIs with Node.js.
- Managed databases with MySQL and integrated with cloud computing services like AWS and Microsoft Azure.
- Managed AWS EC2 servers and databases with AWS RDS, as well as implemented infrastructure as code with AWS Amplify.
- Configured and maintained SSL certificates and managed domain name systems (DNS).
- Executed deployment processes, ensuring efficient delivery and updating of applications.
- Developed skills in self-management and effective remote work.

Front End Developer / Freelancer — 10/2021 — 01/2022
MAD Atacado — *Belo Horizonte, MG*

- Made improvements in design, responsiveness, and performance of e-commerce websites, enhancing end-user experience.

WordPress Developer / Self-employed — 06/2020 - 10/2020
NebulaSkins — *Personal Project*

- Created and managed an E-commerce site specializing in Counter-Strike: Global Offensive skins, using WordPress and WooCommerce.
- Applied SEO practices to improve visibility and ranking in search engines.
- Practiced self-management to handle all aspects of the business, from development to customer support.

Education

Bachelor's Degree in Physics, *Federal University of Minas Gerais (UFMG)* — Expected completion: 2025
Currently enrolled, I aim to bring the problem-solving skills of Physics to development.

Full Stack Web Development, *Trybe* — 2021 - 09/2022
Intensive training with over 1500 hours covering web development fundamentals, including Front-end and Back-end, computer science, software engineering, agile methodologies such as Scrum and Kanban, as well as essential behavioral skills for the collaborative work environment.
